

WHAT IS CLAIMED IS:

1. A sample processing apparatus comprising:
 - a main unit for processing a sample;
 - a recording means for recording information of an operation in said main unit as predetermined data, which information includes a plurality of data corresponding to outputs of a plurality of sensors installed on said main unit; and
 - a display unit for displaying each of said data corresponding to outputs of said sensors simultaneously.

2. A sample processing apparatus comprising:
 - a main unit for processing a sample;
 - a recording means for recording data as information of an operation in said main unit operated during a predetermined period, which information includes a plurality of data corresponding to outputs of a plurality of sensors installed on said main unit; and
 - a display unit for displaying each of said data corresponding to outputs of said sensors for portions of said predetermined period.

3. An apparatus for fabricating a semiconductor device comprising:
 - a plurality of treating units for processing or treating a sample;
 - a recording means for recording data as information of operations in said plurality of treating units operated during a predetermined period, which information includes data corresponding to a plurality of events in said operations exercised by said plurality of treating units; and
 - a display unit for displaying each of said data corresponding to said plurality of events for portions of said predetermined period.

4. An apparatus for fabricating a semiconductor device comprising:
- a plurality of treating units for processing or treating a sample;
 - a recording means for recording data including information of a plurality of operations operated in parallel during a predetermined period, by said plurality of said treating units; and
 - a display unit for displaying each of said data corresponding to said plurality of operations for portions of said predetermined period simultaneously.
